Description	Arkansas FOIA Request — ALPR Misuse Findings, Audit Records and Disciplinary Disposition Dear Records Custodian: As an Arkansas citizen, I request electronic copies of the following existing records under the Arkansas Freedom of Information Act, Ark. Code Ann. § 25-19-101 et seq. This request concerns the reported LRPD finding that an officer searched the same license plate 28 times over approximately 10 days and that the activity was classified as misuse. That description is provided to identify the records sought, without assuming the accuracy of every reported detail. Please provide records existing through the date this request is received: 1. Audit and investigative findings. The audit report, findings memorandum, referral, investigative summary, conclusions and releasable supporting records documenting the identified searches and the determination of misuse. 2. Search records. Existing audit entries underlying the finding, including search IDs, timestamps, account identifiers, stated reasons, case references, search types and network scope, where maintained and releasable. Actual license-plate strings and identifying information about the person associated with the vehicle may be redacted. Please preserve a consistent replacement label where practicable so repeated searches remain identifiable. 3. Disciplinary disposition and administrative finality. Existing records documenting any resulting suspension, termination, reprimand, other corrective action or determination that no action was warranted. Include releasable decision notices, effective dates, administrative appeal

records and records establishing whether any suspension or termination proceeding is administratively final. 4. July 3, 2026 Q2 audit memorandum. A current copy of "License Plate Reader Quarterly Audit Report—2026 Q2," from Sergeant James Phillips to Lieutenant Courtney Bewley, previously supplied in request PDFOI-2026-2594 as "LPR 2026 Q2 Audit Report_Redacted.pdf." Please include any previously withheld portions now subject to disclosure and releasable records supporting its findings. The released copy contains a withheld paragraph marked only "25-19-105." 5. Applicable policy and audit procedures. General Order 325 dated July 14, 2025, together with any intervening revisions and existing audit instructions, checklists or criteria applicable to the identified searches. Include existing records describing how reviewers verify that entered search reasons correspond to an authorized investigation, assignment or other official purpose. 6. Public statements. Existing statements, releases or correspondence provided to news organizations or the public describing this finding, the action taken, or whether the searches involved a plate associated with a minor. I do not request the minor's identity, actual plate number, address or other identifying information. Please search responsive records maintained by the RTCC, Professional Standards/Internal Affairs, the Chief's Office and other appropriate custodians, including responsive vendor-hosted records available to the City. This request seeks existing records. It does not require a new investigation, statistical calculation or explanatory report. I recognize that some records may remain exempt under § 25-19-105(c)(1) or § 25-19-105(b)(6). For any withheld record or portion, please identify the applicable exemption with sufficient specificity to explain the withholding. Please release reasonably segregable, nonexempt portions under § 25-19-105(f) rather than withholding all related records solely because an investigation remains open. If no responsive records are located for an item, please identify that item in the response. If another custodian controls responsive records, please identify that custodian. Electronic delivery in existing native formats is preferred. Duplicate copies need not be provided. Please notify me of anticipated charges before incurring them. Thank you, John McKeehan Arkansas Accountability Project arkansasap@gmail.com
