Please find attached the documents responsive to your FOIA request. Each attachment has been clearly titled to identify the information or subject matter to which it pertains.

Regarding the number of license plates scanned by the Flock system, we are unable to provide statistical data for any date prior to July 14, 2026. It was our understanding that this information could be compiled and retrieved upon request. However, during our review and preparation of records responsive to this FOIA request, we learned that Flock does not retain statistical data of this nature for longer than 30 days. This includes statistics regarding the number of license plates scanned and the number of alerts generated. The only information currently available beyond the 30-day retention period is the department's audit log.

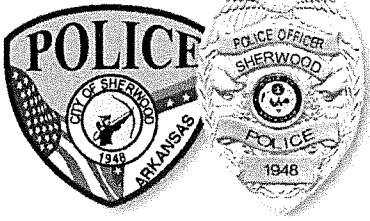

This email serves as the delivery of all responsive documents currently available to the department that fall within the scope of your request.

Additionally, your request has assisted us in identifying deficiencies in our current reporting and recordkeeping procedures. We are reviewing and revising those procedures to ensure that appropriate records are maintained and that our practices comply with applicable Arkansas statutory requirements going forward.

Description

City_in_General

****Subject: Arkansas FOIA Request — Eighteen Months of ALPR Hotlist Statistics, Outcomes, and Required Reports**** Pursuant to the Arkansas Freedom of Information Act, Ark. Code Ann. § 25-19-101 et seq., I request the following public records concerning the Sherwood Police Department's use of Flock Safety automatic license plate reader technology. The requested period is ****February 10, 2025 through August 10, 2026****, representing the 18 months preceding the date of this request. ### 1. Eighteen months of compiled ALPR statistics Please provide all statistical data compiled and preserved pursuant to ****Ark. Code Ann. § 12-12-1805**** for the requested 18-month period. This includes every completed six-month report, interim compilation, spreadsheet, database export, dashboard report, or other record containing the statistics required by § 12-12-1805. For each applicable reporting period, please provide:

1. The number of license plates scanned;
2. The names of the lists or databases against which captured plate data was checked;
3. For each list or database, the number of confirmed matches;
4. The number of matches that, upon further investigation, did not correlate to an alert; and
5. The number of matches that resulted in arrest and prosecution.

Ark. Code Ann. § 12-12-1805 requires this information to be compiled every six months in a format sufficient to allow public review and preserved for 18 months. Please identify the beginning and ending dates covered by each compilation or report. ### 2. Sherwood Policy 11.08.00 six-month reports Please provide every six-month statistical report compiled or preserved during the requested 18-month period under Sherwood Police Department Policy 11.08.00. The policy requires these reports to contain:

1. Total license plates scanned;
2. Database names queried;
3. Number of hits;
4. Number of confirmed hits;
5. False alerts; 6
- . Arrests and prosecutions resulting from ALPR use; and
7. Investigations initiated from ALPR alerts.

If these are the same reports responsive to Item 1, one copy of each report is sufficient. ### 3. Hotlist hits and alert outcomes Please provide all existing and retained records covering the requested 18-month period that document hotlist hits and their outcomes, including: * Alert exports; * "Mark Outcome" records or exports; * Alert-disposition reports; * Hotlist activity reports; * Flock Safety dashboard exports; * Spreadsheets or database reports; * Records used to compile the reports required by § 12-12-1805 or Policy 11.08.00; and * Other records sufficient to determine the disposition of ALPR alerts. For each reporting period, please provide records sufficient to determine:

1. Total hotlist hits or alerts;
2. Number of unique vehicles or unique plates represented;
3. Number of repeat or duplicate alerts involving the same vehicle or plate;

4. Hotlist source or category, including NCIC and NCMEC Amber Alert;
5. Number of alerts visually verified by an officer;
6. Number confirmed through ACIC, NCIC, or another authoritative database;
7. Number of confirmed matches;
8. Number of matches that did not correlate to an alert after further investigation;
9. Number of false alerts, misread plates, or incorrect vehicle matches;
10. Number receiving an officer response;
11. Number for which no response or outcome was recorded;
12. Number of investigations initiated;
13. Number of vehicle or property recoveries;
14. Number of wanted or missing persons located;
15. Number of arrests;
16. Number of prosecutions; and
17. Any other outcome or disposition category maintained by Sherwood or Flock Safety.

This portion requests all responsive records that currently exist and are retained. It does not assume that every underlying raw alert record is subject to the same 18-month preservation period imposed on the compiled statistical data by § 12-12-1805. ### 4. Records supporting the portal's 4,577-hotlist-hit figure On August 10, 2026, the Sherwood Police Department's Flock Safety Transparency Portal reported **4,577 total hotlist hits over the preceding 30 days**.

Please provide the specific report, export, calculation, or underlying record used to display or support that figure. Please also provide:

1. The exact beginning and ending timestamps used to calculate the rolling 30-day total;
2. The number of unique plates represented;
3. The number of repeat alerts;
4. The number of confirmed hits;
5. The number of false or unconfirmed alerts;
6. The number of investigations initiated;
7. The number of recoveries;
8. The number of arrests and prosecutions; and
9. The number of alerts with no recorded outcome.

If the portal's 30-day period does not correspond precisely to July 12 through August 10, 2026, please provide the actual period used by the system. ### 5. Definitions and reporting documentation Please provide any data dictionary, report instructions, Flock Safety documentation, or departmental guidance used during the requested period to define or calculate: * Hotlist hit; * Alert; * Confirmed hit or confirmed match; * False alert; * Mark Outcome; * Investigation initiated; * Arrest; * Prosecution; * No outcome or unmarked outcome; * Unique vehicle or unique plate; * Repeat or duplicate alert; and * Matches that did not correlate to an alert after further investigation. ### Privacy and redaction This request does **not** seek license-plate numbers, vehicle images, names, addresses, or other personal identifying information. Plate numbers and identifying information may be redacted while preserving nonidentifying fields such as: * Alert or event identifier; * Date and time; * Hotlist source or category; * Verification

status; * Response status; * General disposition; * Whether an investigation was initiated; * Whether a recovery occurred; and * Whether the alert resulted in arrest or prosecution. If any information is withheld or redacted, please provide all reasonably segregable nonexempt portions and identify the specific statutory exemption supporting each withholding or redaction. ### Format Please provide responsive records electronically in their existing native format. Spreadsheets, structured reports, and database exports should be provided as CSV or XLSX files rather than converted to PDF when reasonably available. If the volume of responsive data exceeds the capacity of a single Excel worksheet, please provide the records as CSV files or divide the production into multiple complete files. Please also disclose the total number of responsive records so completeness can be verified. If no responsive record exists for a requested category, please state that no responsive record was located. If a required six-month compilation or report has not been completed, please state that no completed report was located and identify the reporting period involved. Please notify me before incurring any charge. If the records are in active use or storage and cannot be produced immediately, please identify when they will be available as provided by Arkansas law. Thank you. John D McKeehan
